1. **General information**  
Japan Aerospace Exploration Agency (JAXA) calls for young researchers participation in various aerospace projects with specialized knowledge which promote the projects more effectively and efficiently. Of this business, JAXA aims many talented young researchers have experiences at the space aviation-related site and learn actual operation of the projects. The employed researchers should support the project from the research side, and in addition, they are asked to promote the cultural and technical information exchange with researchers outside JAXA.

2. **Themes in the recruitment**  
Select one in the following research themes ("1～18") to apply. Another set of application documents are required if you wish to apply more than one theme. Also see the attached sheet#1 for detailed description of each theme.
